

# NIBIN MAKES THE EVIDENCE OF ONE THE EVIDENCE OF ALL

1

Police officers in Greensboro, North Carolina, were dispatched to a robbery and shooting at check cashing service center. The armed security guard there had been shot.

2

Among the evidence found at the scene were several 9mm and .45 caliber cartridge casings. Additional evidence suggested that the suspects may have had ties to the north east.

3

IBIS was used to search the ballistics evidence against the NIBIN database.

4

The NIBIN search allowed forensic experts to establish links between the Greensboro robbery and shooting, two shootings in Maryland, and a murder Washington, DC.

5

These links helped lead investigators to two suspects in Reidsville, North Carolina who were found in possession of two firearms.

6

Forensic experts in Raleigh linked the suspects' firearms to the Greensboro robbery and shooting and the Washington, DC murder.

7

The case is pending before the courts. NIBIN provided critical leads to police across three jurisdictions to stop two violent and mobile criminals who could have otherwise escaped detection.

8

The right balance of people, processes, and technology made for a job well done.
